

Pre-Id File Layout (Last Updated September 2018)

Notes and Recent Updates

Note 1: The file format is comma delimited (.csv or .txt) instead of fixed field format. Therefore, field lengths are determined by the database, not by start and ending positions in the file. If the length of the data for a field in the file exceeds the record length established in the database, the data in the file will be truncated to fit the database field.

Note 2: While all positions in the file need to be accounted for, the fields **highlighted in yellow** are required to have the appropriate data entered.

Note 3: UIC is required for all students to pre-id (public, nonpublic, and homeschooled students).

Note 4: The following fields are available for *nonpublic and homeschooled students only* and will not be updated for public school students: SE, EL, MS, ED, Address, City, State, Zip Code, Birth Order, FEL, Homeless, Foster Care, and Military Connected. These fields will be populated using MSDS for public school students.

Note 5: The order of fields is important.

Note 6: Updated fields from the previous layouts are as follows:

Column	Field Name	Update	Update Date
R	EL	Changed Field Name from LEP (Limited English proficient), to EL (English learner)	7/18
V	FEL	Changed Field Name from FLEP (Formerly limited English proficient), to FEL (Former English learner)	7/18
Y	Foster Care	Added field	9/18
Z	Military Connected	Added field	9/18
